OBJECTIVE

Seeking a full-time Software Development Engineer in Test (SDET) role to leverage my automation expertise and contribute to high-quality software delivery in Agile environments.

SKILLS

- **Languages:** Java, Python, C#, SQL
- **Automation & Frameworks:** Selenium WebDriver, TestNG, Cucumber (BDD), TDD, Page Object Model (POM), Data-Driven, Tapsium Framework, Pytest
- **CI/CD & Tools:** Jenkins, Azure DevOps, Git, GitHub Copilot, IntelliJ IDEA, Eclipse, Postman, DBeaver
- **Testing Expertise:** Functional Testing, Regression Testing, UAT, Integration Testing, Smoke Testing, Root Cause Analysis
- **Database:** PostgreSQL, SQL Server
- **Soft Skills:** Communication, Analytical Thinking, Team Collaboration, Mentorship

WORK EXPERIENCE

Quality Engineering Analyst

Mar 2025 – Present

Verizon. Infosys

Bangalore. India

- Developing & maintaining BDD test suites with Cucumber and Gherkin, improving collaboration with business teams.
- Using GitHub Co-pilot(Generative AI) to optimize Selenium and BDD scripts, reducing script development time by 30%.
- Optimized health check scenarios/test suites, improving pass percentage from 60% to 85% and ensuring more stable builds.
- Automated 50+ test cases in Selenium, reducing manual testing effort by 20%.

Software Quality Engineer

Sep 2021 – Feb 2025

British Petroleum (BP), Infosys

Bangalore, India

- Provided technical advice, to improve the quality of engineering practices.
- Developed Automation scripts in Selenium with C# using cucumber(BDD) framework
- Created comprehensive test plans, test scripts, and use cases to support testing objectives.
- Trained and mentored junior engineers, providing guidance and direction.
- Collaborated with other departments to facilitate successful project completion,
- Created detailed bug reports outlining the issue, its severity level, steps taken to reproduce it and suggested solutions for each defect discovered. Which helped reduce the defect resolution time by 15% and enhanced developer productivity.
- Collaborated with developers, designers, project managers, business analysts and other stakeholders throughout the development process.
- Assisted with root cause analysis for production Issues Identified by customers or users.
- Analysed user requirements and developed test plans, scenarios, scripts and procedures.
- Participated in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives, contributing to continuous improvement in testing processes.

EDUCATION

Bachelor of Technology in Electrical Engineering, MAKAUT

2017 – 2021

CERTIFICATION

- Infosys Global Agile Developer Certification
- Infosys Certified Selenium Automation Tester

PROJECTS

- **Naukri Website Resume Automation (Java + Selenium + TestNG + Jenkins)**
Designed a custom automation framework to log in, delete, and re-upload resumes on Naukri for better profile visibility. Integrated with Jenkins scheduler to run daily at 9 AM IST, eliminating manual effort and saving ~30 mins daily.
- **E-commerce Website Automation Using Selenium:**
Automated the end-to-end testing of an e-commerce platform using Selenium. This included key user actions such as logging in, adding items to the cart, entering address and payment details, completing the checkout process, and logging out.
